## PROFESSIONAL SUMMARY | Full Stack Developer

- 20+ years of experience building scalable, secure, and user-centric web applications for the intel, health care, defense, education, and legal industries in public and private sector roles.
- Proficient across full stack architecture from CI/CD DevOps and IaC through databases and back ends to front end design, implementation, responsive styling and SEO.
- Proven success designing and deploying production systems on Heroku, AWS, and GCP with 99%+ uptime, rapid and reliable deployment, and low overhead costs.
- Strong communicator and mentor reliable on remote Agile teams and independent project delivery consistently on schedule and delivering high quality, fully tested code.
- Recent focus on modernizing internal IT processes in a legal setting through automated workflows integrating legacy application APIs to reduce time requirements and errors.
